
DELY_{pbr}

PLANT: plant with high chill requirement. The plant has medium-high vigor, and an average foliage density. Rustic plant, quite resistant to leaf and root diseases. Very high productivity. Harvest is long lasting and usually has a second flowering.

FLOWERS: within the foliage, medium size, rich in pollen and of very easy pollination.

FRUIT: short heart-shaped, with medium sized calyx, large berries. Fruit color uniformly bright red; red flesh, good texture and firmness. The flavor is excellent, very fragrant with hints of wild strawberry. One of the best varieties for those who love aromatic strawberries. Its exceptional organoleptic characteristics make this fruit ideal for direct sales and fine pastries.

FLOWERING TIME: Early and continuous throughout the season

HARVEST: Early, harvest season begins at about the same time as Clerypbr but lasts longer.
